

Keynote

Title	The Corporate Action Hero
Presenter	John Davis
Abstract	
<p>Motivational Speaker, John Davis, known as the Corporate Action Hero, was born with a debilitating back disorder and wanted to live the life of an "Action Hero." By setting seemingly impossible goals for himself, John went on to become a Stunt man, a Fight Director, a College Professor, Artistic Director, Business Leader, Internationally known Speaker, Comedian, Author and yes an Action Hero on stage and in film.</p> <p>John speaks to audiences of all ages and backgrounds. He has presented in 28 countries and has delivered over 4000 live presentations. Even to the front lines of both Iraq and Afghanistan with the USO.</p> <p>John's programs inspire audiences to create, "Vast successes one successful moment at a time." His presentations are fun, interactive, with NO POWERPOINT. The "Action Hero Mindset" programs cover: Thriving during change, Inspiring present moment action, Leadership, Customer Service, Sales, Success, Emotional Intelligence, Effective Communication, and Stress Management.</p>	

OVOAUG Special Session

Title	Current State and Future Direction of OVOAUG Board
Presenter	OVOAUG Board Members
Abstract	
<p>Please join us for a special session to discuss the future of your Geo, the Ohio Valley OAUG. During this session we will</p> <ul style="list-style-type: none"> • Share Survey Results from a recent polling of OVOAUG members • Present OVOAUG metrics and trends • Discuss ideas and seek your feedback on how to shape our user group going forward <p>Bring your ideas, we want your active participation and feedback!</p>	

Oracle eBusiness Track I

Title	Best practices in application security design for Oracle E-Business Suite
Presenter	Jeffrey Hare, ERP Risk Advisors
Abstract	
<p>Proper application security and role design forms the foundation of your internal controls environment. Pool role design during the implementation of ERP applications leads to excessive risk, Segregation of Duties issues, and audit findings. In this session, Jeffrey T. Hare, CPA CISA CIA will share the foundational principles of good role design and give you the top tips for staying out of trouble with your auditors.</p>	

Title	Complex WMS Wave Execution at a large CPG distribution center with Sorter & ASRS picking
Presenter	Vishal Choudhari, Inyxa
Abstract	
<p>This session will focus on a very large CPG company that ships over 300 trucks across its distribution network every day. We will share how Wave Planning Execution is achieved with Oracle E-Business Suite & WMS at their largest DC. Integration with transportation & material handling equipment is leveraged for real-time visibility into wave execution. Almost all shipments are full truck load, and most pallets are mixed pallets – with picked cases travelling through a maze of conveyors– to arrive at one of 21 consolidation lanes.</p>	

Title	Spare Parts Business Process Solved with Custom APEX Solution that integrates with EBS
Presenter	Matt Hauser, AXIA Consulting
Abstract	
<p>The Spare Parts business process at Intelligrated was built utilizing a custom application that only one person could support. It relied on nightly updates of data from Oracle and had a number of manual processes that could introduce inconsistencies to the data that was then sent to customers. A new tool was built utilizing Oracle APEX that pulls data in real-time from the Oracle Inventory, PIM, Advanced Oracle Pricing and Order Management. APEX out of the box provides analytic tools for pivoting and building reports to help manage the process. The new tool also calls Oracle APIs to update UDAs and Generate Pricing for all parts that are being sent to the Customer. This presentation will show what was built for Intelligrated, and features that are inherent within Oracle APEX.</p>	

Oracle eBusiness Track II

Title	Oracle System Extract – A simple way to generate interface
Presenter	Mahendhiran Ganesan, Worthington Industries
Abstract	
<p>Oracle System Extract is a powerful tool provided by Oracle Advanced Benefits. This is a user-friendly tool enables user to generate interface from various HR, Payroll business functions without writing any program. It enables to define extract criteria like record inclusion or exclusion based on event that can be used to support Changes or Full file. It has the capability for calculation, formatting, and conditional logic. This tool provides the flexibility to generate web enabled and text output. By using rule type fast formula, any information that are not directly available in data fields can be derived.</p>	

Title	Revenue Recognition: Prepare now for ASC 606 and IFRS 15
Presenters	Jene Straton, Oracle
Abstract	
<p>Come learn more about how Revenue Management Cloud Service works with Oracle EBS, as well as Hyperion EPM tools, to address the new accounting standard for Revenue from Contracts with Customers.</p>	

Title	How Toyota Boshoku is saving time and money using spreadsheet integration for BOM and Price Lists.
Presenter	Tony Maschinot, Toyota Boshoku
Abstract	
<p>At Toyota Boshoku, large quantities of data took a long time to enter into Oracle EBS and be mirrored in other key data systems; a common problem of successful, fast growing companies. Manual data entry also resulted in errors between systems, causing inventory issues. After an evaluation of the solutions in the market, we found the right fit in using a third party MS Excel Oracle integration tool. See how we improved our Oracle BOM and Price List data management to recognize significant time and resource savings.</p>	

Hyperion Track

Title	Working Effectively with Oracle Support – Alternate Title “Confessions of a former Oracle Hyperion Support Engineer”
Presenter	Larry Geraghty, The Wendy's Company
<u>Abstract</u>	
<ul style="list-style-type: none"> a. Important Details to Include in SR b. How to easily include all logs and environment details c. Tips and Tricks to get a response to an SR d. How to get past the, “You need to patch” answer e. Getting to the “Right” Support Engineer 	

Title	Hyperion upgrade to 11.1.2.4
Presenter	Raman Galla, Boardwalk Pipeline Partners Jeff Wright, Boardwalk Pipeline Partners
<u>Abstract</u>	
<p>We have recently upgraded Hyperion version 11.1.2.1 to 11.1.2.4. I would like to share some of our experiences about this upgrade and new version updates. I will send detailed steps in PowerPoint presentation.</p>	

Title	Building Bridges in Hyperion Planning
Presenters	Dennis Hogan, Finit Solutions
<u>Abstract</u>	
<p>The P&L and Balance Sheet provide great data for use in analyzing performance for a period. Often these statements show results for the current period in comparison to prior periods or budgeted/forecasted data for the period. Typically, a variance column is included to show the difference between these periods or scenarios. This information tells us what occurred but does not address the why it occurred. This is where Bridges come into use. Using Bridges analysts can explain the changes in financials across a variety of periods, years and scenarios (Year over Year, Quarter over Quarter, Actual vs Budget etc.). As an example, a bridge may start with Q1 actuals for last year and end with the current year forecast for the same period. The analyst then enters data into a variety of categories that typically drive our variances. These values in the categories “bridge” the gap between the starting and ending period to provide quantitative insight into reasons for the changes.</p> <p>This session will demonstrate one approach for using Hyperion Planning to facilitate and streamline this bridge process. Analysts use this tool to enter values into the various bridge categories like volume, price, and plant productivity to explain and quantify the portion of the variance that was driven by changes in each category.</p>
